SUMMARY

Web Developer skilled in **React, Node js, Java, JavaScript (ES6+)**, **HTML 5, CSS 3** with hands-on experience in **Data Structures & Algorithms**, integrating **RESTful APIs**, **payment gateway systems**, and **backend & AI services**. Proficient in **Git / GitHub**, **SPA**, **UI/UX debugging**, **web accessibility (a11y)**, and developing **scalable, high performance, cross-browser compatible, SEO Optimized** web interfaces.

PROJECTS

VISTYO — AI-Powered SaaS for Productivity

React.js, Appwrite, Stripe, RESTful APIs, Tailwind CSS, Redux Toolkit, Vite, Cohere AI [Deployed Link](#)

- **Engineered REST API** integrations with YouTube, Google Data APIs, implemented semantic context filters via Cohere AI to ensure task-relevant content delivery
- Integrated Stripe Payment Gateway for secure **subscription handling**, utilizing **Checkout Sessions** and **Webhook validation** to enforce **backend-driven plan restrictions**
- **Architected Plan-Based Access Control (PBAC)** at the service and database level using **Serverless Functions**, preventing client-side access **tampering**
- Designed scalable data fetching with **cursor-based pagination** and **batched API requests**, improving **data load efficiency by 40%** for high-volume content workflows
- Embedded **real-time performance (99%)** observability using Vercel Analytics and Speed Insights, enabling **30% faster detection of UX metrics deviations**
- Implemented defense-in-depth security patterns, including **input sanitization, API proxying, and Appwrite rule-based validations** to safeguard against **XSS and unauthorized data mutations**

CAMPUS-AI (National Hackathon 3rd Prize) | *React.js, Flask, Firebase, Python* [GitHub Repo Link](#)

- Developed a dynamic, component-driven web platform integrating **Facial Recognition Attendance, Geolocation Access Control**, and a **Campus E-commerce Marketplace**, all linked to a real-time **database**
- Engineered scalable **UI component architecture** and **reusable layouts in a 36-hour collaborative sprint**, ensuring **responsive design and seamless feature scalability**
- Enhanced UI state management **resulting 30% faster** user feedback loop and **25% reduction** in response lag

ADDITIONAL PROJECTS | *JavaScript, StoryBook, Jest, React Query, CSS3, HTML5* [Deployed Link](#)

- Engineered modular web applications (Landing SPA, ToDo App, Memory Game, Image Carousel, Tic-Tac-Toe, Quote Generator) with API integrations, while developing **pixel-perfect, responsive UIs** using modern frameworks and libraries to ensure **cross-browser compatibility** and strong web development fundamentals.

EDUCATION

Guru Gobind Singh Indraprastha University (ADGIPS) New Delhi, India
B. Tech in Computer Science and Engineering | **CGPA: 9.06/10** Aug 2024 – Aug 2028

Green Fields School (CBSE) New Delhi, India
PCM + Computer Science | **88.6%** 2024

CERTIFICATIONS & ACHIEVEMENTS

- **Core Technical Team Member at Google Developer Group, GeeksforGeeks** contributing to tech events and collaborative projects; **certified in Full Stack Web Technologies** (Great Learning, Scaler, Knowledge Gate, etc.); secured **3rd Place in a National Hackathon** and **3rd Prize at a Science Innovation Fair** for innovation and problem-solving; successfully qualified the **AutoCAD Design Test** by IIT Delhi. [All Certificates Link](#)

TECHNICAL SKILLS

- **Languages & Frameworks/Libraries:** **Java, React JS, JavaScript (ES6+), Node JS, Appwrite, Stripe, Firebase, Jest, StoryBook**, Tailwind CSS, Material UI, DomPurify, Lucide React, HTML 5, CSS 3
- **Tools & Practices:** **Git / GitHub**, Database Schema Modeling, UI/UX Debugging, Responsive & Dynamic UI Design, Performance Optimization, SEO Optimization, Mobile-First Design, CI/CD Friendly Code, Chrome DevTools, Team Collaboration, Agile & Scrum-based Development, Vercel
